The ***Interprofessional Pain and Headache Rounds and Case Studies and Literature Reviews*** are designed to encourage the exploration across a wide range of academic topics. We invite clinicians, scientists, students, and patients who seek knowledge through interactive seminars and forums which inspire collaboration, reflection, and discourse.

Our primary goals focus on providing evidence-based content, while understanding the importance of exploring empirical support for novel avenues of patient care.

Advisory Board

Paul Arnstein, RN, PhD, FAAN

Julia Buckley, Patient advocate, journalist/author

R. Bruce Donoff, DMD, MD

Christopher J. Gilligan, MD, MBA

Omar Hernandez, Senior Administrative Judge

Nicole Holland, DDS, MS

Elvira V. Lang, MD, FSIR, FSCEH

These programs are a complimentary year-long lecture series focusing on pain and headaches, although a wide range of topics are covered which are relevant for healthcare providers, researchers, public policy specialists, patients, and other important stakeholders. Our virtual format was specifically developed to provide better access for clinicians and patients who represent underserved communities, and we now provide a platform for assessing the effectiveness of these efforts. Rounds Lectures are presented by the Tufts University School of Dental Medicine Craniofacial Pain Center in collaboration with Massachusetts General Hospital, Harvard Medical School, and Harvard School of Dental Medicine. CE is available for dental professionals. Multiple orofacial pain training programs now participate in the Saturday morning Case Studies & Literature Reviews and CE is available for dental professionals.

Preregistration is now required for each session to gain access to the Zoom webinar link unique to each session.

[FIND REGISTRATION LINKS HERE](#)

Please be sure to check your confirmation email for the secondary Zoom registration link as well.

Membership: While all live presentations are complementary, we also prepare program recordings at the discretion of our speakers. Due to the expense of preparing this program, we have decided to establish a membership option that allows access to curated recording, information on relevant clinical trials, and other benefits now commonly requested by our attendees. With the exception of several small non-profit grants, most of this work is unfunded. We welcome other avenues of support that can help us better accomplish our educational mission.
